Glimpse of the RUSA Component 3 :

With the help of RUSA grants there is tremendous improvement in infrastructure and learning resources. University staff, students all are benefited with modern facilities and work ambiance that have improved their working efficiency. Students have been provided with latest knowledge resources, modern facilities for learning and research that have improved their research aptitude. Modern scientific laboratory with modern instruments have improved quality of research and output in terms of publications.

It is of utmost importance for the university at this juncture to have more grant-in aid departments so that more and more students of this area gets opportunity to go for higher education especially Master, M. Phil. And Ph. D. Degree so as to make them globally competitive. At present the university has only 8 Grant-In-Aid departments and limited faculty. With improvement in number of faculty the University can perform better in terms of research and publication. It is also needed to improve the student teacher ratio which will lead to better performance of the University.

HNGU is the largest affiliating University of the state. It started with 48 affiliated colleges in the year 1987 which has now grown to have 370 plus affiliated colleges and on the other hand the administrative staff has reduced to half. This has decreased the performance of the University, but still we received "A" grade in the second cycle of NAAC accreditation and also received 3 star in GSIRF.

It is expected that the requirements of the University may be fulfilled at the earliest to as to improve the quality of teaching and research.
